ICINGA

Why Choose Icinga?

Open Source Monitoring for Enterprises that value control, flexibility, and transparency.

AT A GLANCE

Icinga offers powerful IT monitoring, tailored for complex environments:

- Open Source & independent – no hidden costs, no vendor lock-in
- Flexible & adaptable – fits any environment: on-premises, hybrid, cloud
- Scales with your growth – from small setups to global enterprise infrastructures
- Transparent & secure – full control over your data and systems
- Strong community with optional commercial support – you choose what fits your organization

YOUR QUESTIONS – OUR ANSWERS

How does Icinga impact our costs?

- Open source software - no mandatory license fees for using Icinga
- Optional subscription for repository access (Enterprise Linux) and support – flexible and predictable
- Predictable additional costs - you control how much to invest in support, services, and training
- Seamlessly integrates with your DevOps stack
- Cost-effective in hybrid setups - combine Icinga with proprietary tools where it makes sense to save overall costs

How does Icinga fit into our IT landscape?

- Customizable rules, alerts, and dashboards
- Easy integration with existing tools (e.g. Prometheus, Graphite, Elastic, cloud providers)
- Plays well with proprietary solutions - use Icinga for broad coverage, commercial tools for specialized cases
- APIs enable automation and CI/CD workflows

Is Icinga future-proof?

- Active development since 2009
- Follows a transparent roadmap
- Vibrant global community and global partner ecosystem
- Supports modern IT (cloud-native, containers, hybrid infrastructures)

How secure is Icinga?

- Full transparency as an Open Sources solution – no hidden code, no backdoors
- Regular updates, security patches, and community-reviewed code

Why Icinga – not another tool?

- vs. proprietary tools: No vendor lock-in, full data ownership, low overall costs
- vs. other open source tools: Modern interface, flexible architecture, broad integration options
- vs. all-in-one tools: Icinga lets you build the stack that fits your organization best

Icinga functions perfectly alongside other (commercial) monitoring tools. Every IT landscape is unique. Icinga gives you the flexibility to build the monitoring stack that fits your needs, without compromise.
